Experience:

Former Assistant Software Engineer at TPDO
(Target Peoples for Development Organization, a non-profit organization)
June 2019 - March 2023
☑ Provided technical support and troubleshooting for all IT-related issues.
☑ Managed social media platforms, implemented IT policies, procedures, and best practices.

Selected Projects:

- **GBDC (Blood Donation App)**
☑ Developed a MERN stack app for finding blood donors and requesting donations. Features include donor photo uploads, multi-user support, blog posts, and a live chat system
🖇 gbdcbangladesh.com
⌨ github.com/aariyanapu/gbdc

- **Bangladesh Times (A News Portal)**
☑ Developed a daily online news portal with database facilities and multi-user functionality, resulting in a 25% increase in site traffic.
🖇 bangladeshtime.com

- **Birthday (Birthday Reminder)**
☑ Reminds users about important birthdays and sends **automated** emails. It stores data locally and syncs to a database upon user login.
🖇 allbirthday.com

- **Article Summarizer**
☑ Developed an AI-powered article summarization app using the ChatGPT API, enabling users to generate concise summaries of articles. The app stores summarized data on the local host.
🖇 mysum.com

- **FawFlix (Movie Streaming Platform)**
☑ Developed a movie streaming website with features including movie search functionality and high-quality streaming
🖇 fawflix.com
